

New Flickr Interface, Alas

Flickr has redesign their user interface. Will take some getting used to. Here's Lee's and Mike's pages:

so apparently "Yahoo wants to make Flickr 'awesome again'"

Well that didn't take long ... :)

The changes present a particularly interesting question. Is the primary purpose of Flickr to view photos or manage photos? The new interface is abhorrent to me, as it makes managing my photos and conceptualizing the management of the more difficult.

But for people who are viewing photos, it is perhaps optimized. Or at least those types of people who like free-flowing content versus ordered in specific buckets or with preset lengths or sizes.

Heck, I don't like it and I don't even use flickr except to view your photos
